

Lana Kornilova

Product Designer / UX/UI Designer / Lead Designer / Art Director

Product and UX/UI designer with 10+ years in web, UX/UI and digital products, including 6+ years in senior and lead roles. I design complex data-heavy B2B interfaces and premium B2C e-commerce products: from gathering and breaking down requirements, user scenarios and information architecture through to prototype, UI, design system, developer handoff and implementation control.

At Control Systems I built a design system from scratch: 50+ components and modules, tokens and documentation in Figma and Confluence, wired to the coded component library in Storybook. It cut the time to produce standard design layouts by around 80%. At TOGAS I rebuilt the account area and checkout of a premium online store, which lifted the number of orders by 25%.

I have led a distributed UX/UI team of up to 16 people: hiring, mentoring, scoping and joint estimation, design review and workload planning in Jira. I read HTML/CSS and basic JavaScript. I use AI tools and vibe coding for research, prototyping and speeding up individual stages of the work, and I set up AI-assisted processes.

Core expertise

End-to-end product cycle (Product Discovery & Delivery) • Information architecture • User flow / CJM • Enterprise B2B and data-heavy interfaces • B2C and e-commerce • Conversion and checkout optimization • Design systems and their documentation • Design-to-development • Working with product metrics • Design leadership / DesignOps • Leading teams of up to 16 people • AI automation & AI-assisted workflow

E-commerce / BigTech // MedTech / SportTech / FinTech

Tools

Figma, FigJam, Miro, Photoshop, Illustrator, InDesign, Tilda Expert, Webflow, Framer, HTML/CSS, JavaScript, Git, Jira, Confluence, Storybook, Google Analytics, Yandex Metrica, GPT, Claude, Gemini, Lovable, Midjourney, Nano Banana, Kling.

Experience

Independent practice (Germany / Turkey / Georgia) | 2023 – Present

End-to-end designer working independently. 20+ delivered projects for small and mid-sized businesses. UX/UI and web design, landing pages and websites, brand identity, presentations, launches on Tilda, Webflow and Framer. Labo project: a landing page for bringing cosmetics lines to the Russian market, along with catalogues and price lists by product line.

Vivanti | 2023 – 2026

Designer on the project team of a medical agency. Presentations, landing pages, email campaigns, infographics and training materials for medical and pharmaceutical companies. Working with complex medical subject matter, scientific and clinical data.

IT Career Hub (Berlin) | 2025 – 2026

Designer / UX/UI Expert. Built the structure and content of a full product and UX/UI design course: around 20 modules across a 9-month program. Created the educational product from scratch — from the program outline to finished lessons, practical assignments and capstone projects.

Verba Mayr | 2023 – 2024

Art Director / Lead Designer. UX/UI redesign of the brand's digital ecosystem: the clinic site, the healthy-nutrition line and the cosmetics line. Traffic to the main site grew by around 20%. Launched 10+ digital campaigns with a single user and visual experience across the brand.

Control Systems | 2021 – 2023

Head of Design and Lead UX/UI Designer. Designed complex enterprise B2B systems and built the product design system from scratch: 50+ components and modules, tokens, documentation, adoption in development. Grew the design team from 2 to 16 specialists. Set up the process from briefing and estimation through developer handoff, review and quality control. Four junior designers reached solid mid-level within six months. The design system cut interface production time by around 80%.

TOGAS | 2016 – 2021

UX/UI Designer → Head of Design Studio. Developed the e-commerce platform of a premium home textile brand: catalogue, product pages, account area, checkout, product landing pages and digital communications. Fully rebuilt the account area and the checkout flow based on research, customer feedback and analytics. The result: orders up 25%, higher average order value, fewer drop-offs at problem steps of the funnel. Launched 4 sites for new lines and sub-brands. Grew from designer to head of the design studio.

Education and professional development

2026 — Wannabe, course in AI process automation

2025 — Tilda Pro, Tilda Expert status

2019–2020 — Yandex Practicum, Frontend Developer

2018 — LoftSchool, Frontend Developer

2001–2006 — Moscow University for the Humanities, degree in Graphic Design

English — B1–B2

Work format: remote, full-time or contract.

Location: Tbilisi, Georgia.
